H₂S SERVICES

It is our goal to ensure your employees and operations remain safe and industry compliant while working with Hydrogen Sulfide. Since 1972, Secorp has been committed to providing and maintaining the most advanced equipment available and the industry's most comprehensively trained staff to assist our customers.

With more than 40 years in the industry, Secorp has earned a stellar reputation for service and support. We were instrumental in the initial design of the industry's first hose line unit and have decades of experience working with companies to achieve and maintain state and federal compliance.

SAFETY TECHNICIANS

At Secorp Industries, we recognize the safety of your employees and the integrity of your project rest in the hands of our technicians. That is why we are committed to providing the industry's most thorough and comprehensive training program available.

Our technicians must take both written and practical examinations and pass their classes with a minimum test score of 80%. We also go above and beyond with our field supervisory system by routinely conducting random rig-up audits, compliance audits and audits by our district management and QHSE teams.

SECORP SAFETY TECHNICIANS

The Secorp Industries "Pipeline" training program is designed to elevate employees beyond current industry standards required for Safety Technicians. Our technicians become full-fledged Professional Safety Technicians and experts in H₂S standards and compliance.

THE PROGRAM PATH FROM BOTTOM TO TOP:

STEP 8: EMPLOYEE NAMED PROFESSIONAL H₂S SAFETY TECHNICIAN

If the employee exceeds the expectations set forth by Secorp Industries' standards, the employee will become a certified Professional H₂S Safety Technician.

STEP 7: PRACTICAL APPLICATION EVALUATION

The final practical evaluation takes place on an active job-site with the employee's mentor. After a thorough practical evaluation, the results are reviewed by Secorp Industries' Management and QHSE group to determine if the employee has obtained the level of skill and knowledge required to represent Secorp Industries and service our clients.

STEP 6: ON-SITE MENTORING PROGRAM

An employee is scheduled with a mentor on an active job-site once he or she demonstrates full practical working knowledge within a shop environment. The employee is graded by the mentor on a variety of categories the employee may encounter on a job-site to ensure full compliance and understanding of industry standards.

STEP 5: SHOP MENTORING

Once an employee passes all exams, he or she will work in our shop environment alongside a Qualified Shop Technician where H₂S equipment is thoroughly tested, cleaned, repaired and maintained. The supervising technician ensures that the employee fully understands how each component is utilized in the field prior to transitioning to an active job-site.

STEP 4: IN-HOUSE H₂S BREATHING AIR CLASS & ELECTRONICS CLASS

Employees must pass both the written and practical portions of these classes with an 80% or higher test score to continue.

STEP 3: WEB-BASED/CLASSROOM GENERAL SAFETY TRAINING

Employees complete approximately 20 hours of training and classwork via classroom and web-portal.

STEP 2: NEW EMPLOYEE INTRODUCTION

Employee receives full understanding of their role within the company and the expectations of this role.

STEP 1: INITIAL EMPLOYMENT

Employee is hired.

www.secorpindustries.com

Performing high angle or confined space work can be a risky endeavor. It's important to have a proven safety company in your corner keeping your team safe and your projects compliant with current industry safety standards.

We offer highly trained safety personnel to supervise your high angle or confined space work; as well as the proper rescue equipment to be kept on-site and ready to go at any time.

SECORP RESCUE SERVICES

Our rescue instructors, technicians and attendants have a wide array of certification levels including: trench rescue, confined space, low/high angle work (levels I-III) and fall protection. We have the ability to oversee and service a multitude of projects with our various levels of experience and certifications.

We also offer rescue equipment packages to be kept on-site, should the need arise. We can work with you to survey your vessel or space prior to a project's start and develop a proper rescue and/or fall protection pre-plan. We work with our clients to ensure compliance with OSHA 29 CFR 1910.146 at all times and prior to beginning a project.

OUR RESCUE SERVICES INCLUDE:

Rescue Packages

- Fall Protection
- High Angle Rescue
- Confined Space Rescue
- Trench Rescue

Certified instructors, technicians and attendants with multiple certification levels

Detailed rescue pre-plans and permits

Confined space entry equipment

- Explosion-Proof Lights
- Air Monitoring
- Ventilation
- Breathing Air Equipment

OUR RESCUE SERVICES COMPLY WITH:

- NFPA 1670
- NFPA 1006
- NFPA 1983
- 29 CFR 1910.146

ABOUT SECORP

Founded in 1972, Secorp Industries is the oldest H₂S company in the United States serving the oil and gas industry. We provide safety services and products for land and offshore operations involved in a variety of projects ranging from drilling and production to refineries and industrial settings.

Our long-term success is attributed to the unmatched comprehensive level of training our employees receive. All of our employees are Professional H₂S Safety Technicians and provide the highest level of service and support to our clients.

MISSION

Provide a broad range of superior safety services and equipment to support our customers' operations by protecting lives with our highly trained professionals.

VISION

To be the worldwide leader in providing unsurpassed safety services for upstream and downstream oil and gas markets and strive to be prepared to successfully enter new markets; as well as enduring changing market conditions which will afford our employees opportunities for personal growth and advancement.
